

LD CLASS

Dual Piston Pumps for Low Pulsation Requirements

The versatile **LD Class** consists of dual-headed, positive displacement piston pumps, delivering unmatched performance for analytical, flash, and small-scale preparative chromatography applications. With the patented SSI low dead-volume Pulse Dampener, advanced cam technology and dual piston mechanism, the **LD Class** provides virtually pulse-free operation.

The pumps are designed for high flow rate accuracy and low pulsation required for Analytical Liquid Chromatography (HPLC). Standard fluid path materials are Stainless Steel and PEEK, in addition to optional Titanium. Other available features include jacketed heads for temperature controlled processes. With 12 mL/min, 24 mL/min, 36 mL/min, and 100 mL/min versions, reaching pressures up to 10,000 psi, these pumps will meet the performance requirements of demanding HPLC needs.

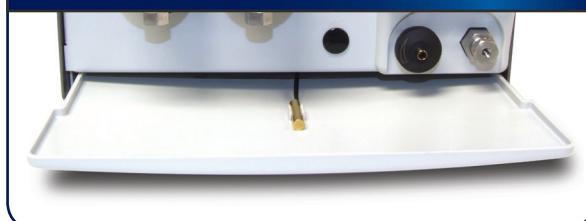

The high performance linear cams, along with automatic pressure compensation, provide precise flow rates for very accurate high pressure and low pressure gradients. Standard features include an integrated Prime-Purge Valve, Pulse Dampener, interactive keypad control, and complete PC control and status through RS-232 and Micro USB 2.0 ports. The **LD Class** provides the precise flow and low pulsation for the most challenging separations.

Components are also available in Kit Form for OEM Applications.

Several Fluid Path Materials Available

Drip Tray & Leak Sensor

Flow Rate

12 mL/MIN
24 mL/MIN
36 mL/MIN
100 mL/MIN

Pressure

Up To
10,000 PSI
(24 mL/MIN)

Fluid Path

STAINLESS STEEL,
PEEK OR
TITANIUM

Control

RS-232, MICRO USB,
RUN/STOP,
ANALOG (0-10V, 4-20mA)
