# AUTOMATE YOUR LAB TODAY

**Most labs have automated elemental analysis with the use of an Autosampler.  
Also automate reagent addition and normalization with the *EasyPREP* Sample Handler.**

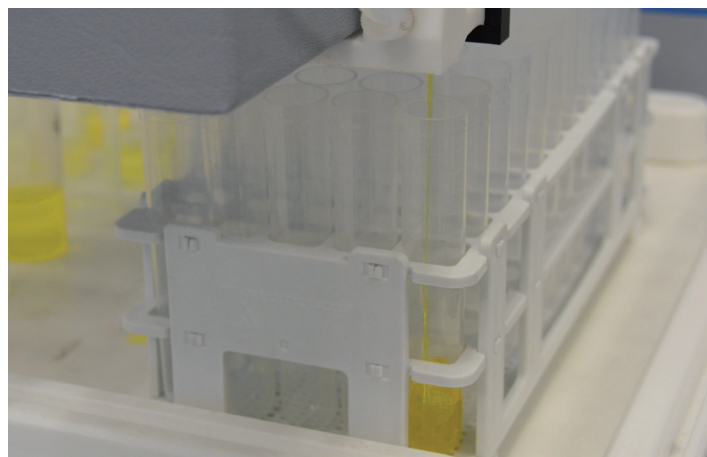

*Digestion acids can be added in multiple steps to prevent vigorous reactions.*

*Sample Handler provides walk away capabilities while ensuring zero cross contamination.*

*Racks move easily from digestion block to **EasyPREP** Sample Handler to improve productivity.*

*Save time when transferring digested, normalized, samples, complete with an internal standard added to your everyday Autosampler Tube, while your Chemist is able up to perform other value added tasks.*

# SAMPLE HANDLER AND MICROWAVE

*NovaWAVE Teflon® vessels, HF acid, and HNO<sub>3</sub> acid being added prior to microwave digestion, will work with any microwave Teflon® vessels.*

*NovaWAVE calibrated quartz tubes being normalized and filled to volume automatically.*

**Dispense acids, reduce acid waste and increase lab safety and accuracy using almost any type of digestion vessel.**

**Call today and book a private WebEx for free with one of our Application Chemists.**

**Company Headquarters phone number: +1 (514) 457 0701.**
